

# Codebook for Prescription Drug Monitoring Programs: Implementation Dates

**Prepared by Legal Science, LLC**

August 2017

## **PRESCRIPTION DRUG MONITORING PROGRAM: IMPLEMENTATION DATES**

*August 2017*

### **Codebook**

This codebook describes the variables in a dataset that provides PDMP operational and access dates across the 50 states and the District of Columbia. This dataset is cross-sectional and is updated through June 1, 2017.

There are six standard variables in every PDAPS dataset. They are:

#### **ID:**

An identification code generated by MonQcle.

#### **FIPS CODE:**

The Federal Information Processing Standard (FIPS) codes are a standardized set of numeric codes issued by the National Institute of Standards and Technology to ensure uniform identification of geographic entities through all federal government agencies.

#### **JURISDICTION:**

This is a dropdown selection in each coding form. It includes the jurisdictions coded in the dataset.

#### **EFFECTIVE DATE:**

This date (MM/DD/YYYY) is the most recent effective date of the legal text captured for this place. The effective date represents the date the policy coded was put into effect.

#### **VALID THROUGH DATE:**

This date (MM/DD/YYYY) is the last date the policy was in effect as reflected by the legal text captured to code this policy.

#### **LEGAL TEXT:**

This is a text box that captures all legal text relevant to the coding questions. This will not download into Microsoft Excel.
